

Having regard the public consultation on [BEREC procedures for public consultations](#), here you have my comments regarding **Draft BEREC procedures for public consultations**:

1. The table containing types of documents produced by BEREC for which public consultation is needed, at the position BEREC Regulatory best Practices - Scope, should be amended by adding a new bullet as follows:
 - On the dissemination of regulatory best practices to third parties (Article 2.e)
2. Article 3.2 should be supplemented with the following provision:
 - In order to ensure transparency of interests, independency and avoid unfair bias of public opinion, the contributions done by stakeholders should be taken into consideration only if derive from unveiled identities.
3. Article 4 should be supplemented with the following provision:
 - No comments under anonym signature should be published. If stakeholders request to keep their identity confidential, in order to ensure transparency of interests and to avoid unfair bias of public opinion, when publishing their contribution will be mentioned the category of author: private person, operator, service provider, local authority, NGA, financial institution, independent expert, etc.

Thank you,
