BEREC

The draft BEREC WP 2012
## Public Hearing Brussels

Georg Serentschy
CEO, RTR-GmbH / Incoming Chair BEREC

Basic principles and assumptions

- The 2011 WP was set up as a multiannual WP

- The draft of the 2012 WP continues the established approach

- Nevertheless since BEREC made reasonable progress this year, that has to be taken into account for the next WP

- The structure is based on the different roles of BEREC set out in the BEREC Regulation rather than the three work streams of 2011

BEREC has to fulfil different roles

- According to Art. 2 of BEREC Regulation there are two types of stakeholders:
  - Political stakeholders (EC, EP, Council, NRAs, nat. politics) and
  - the market and the environment
- BEREC therefore shall develop best practices,
  - Common approaches, methodologies or guidelines on implementation
- provides assistance to NRAs (on request),
- delivers opinions on draft decisions, recommendations and guidelines of the EC,
- issues reports ("monitoring of the market") and provides advice, delivers opinions to the EP and the Council and
- assists the EP, the Council, the EC and NRAs in relations, discussions and exchanges with third parties

BEREC

BEREC Strategy Framework

BEREC Work Programme

To ensure consistency in the application of the European regulatory framework within the Member States and the EU by improving harmonisation and development of the internal market in the interest of the citizens of Europe and the promotion of competition as the over all task

Consistency of remedies and review	Promotion of Broadband	Set up BEREC Office
Implementation of CP (Termination, NGA)	Network Neutrality	Tasks with regard to Art 7/7a FD procedures
Implementation of relevant tasks (Regulatory accounting, non-disc.)	Consumer empowerment	Cross-border and demand-side related issues
Roaming / Business Communication / Origination for VAS	Spectrum Management	International cooperation

Input from stakeholders

Work items / deliverables / EWGs
