Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 15:40:11

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 15:30:17

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Date: 17 July 2016 15:30:14

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 15:30:10

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 15:20:24

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

The free to use internet has been of huge benefit to all people who are able to access it. It has enabled the establishment of small, medium and large businesses in areas of commerce undreamt of just a generation ago. Allowing big multinational companies to carve up the current arrangements to their benefit, will be hugely damaging to smaller businesses and will lead to anti competitive developments. The small users will be hugely disadvantaged as there will no longer be a relatively level playing field for start up businesses. Private individuals will have to pay much more for access, which in turn leads to the less well off being restricted to a potentially sub standard service.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 15:20:21

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements survive next to dominant players.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Date: 17 July 2016 15:00:19

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 15:00:15

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 15:00:09

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 14:50:14

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

From: [Pamela McLean](#)
To: [NN-Consultation](#)
Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 14:30:20

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

The internet is one of the few places that are not skewed to the benefit of big big business. It has been a wonderful resource for enabling innovation and for building community. For people like me, it is a way to find new friends who have shared interests, both in my local area and across the globe. In the present time of uncertainty and rapid change it is more important than ever the individual people and small organisations are able to reach out to each other in friendship and in ways that help people and planet to thrive. Too much of our world is dominated by faceless big business, and the rich. Too many problems are caused by "the rest of us" feeling disconnected and that we are not able to be heard. We need the Internet to be neutral channel, not something taken over by the rich, not something that increases the separation between "power" and "the rest of us".

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 14:30:20

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam

We need protection from corporate takeover of the internet - to foster creativity, diversity, competition and innovation.

By taking the highest bidder we leave behind independent and citizens' media.

I urge you to close all loopholes in the current proposals that would allow service providers to prioritize certain content and act as gatekeepers, through preferential treatment, “zero-rating” or class-based traffic management - like in Brazil, US and India.

Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

The Internet has the potential to make this world more democratic, provide education for the momentarily disadvantaged and connect people so to overcome prejudice and racism.

It is my wish that this potential is used! This is only possible if the Internet is open to everyone with the same speed for everyone!

Here are some more points to consider:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

Already Search Engines (particularly Google) have been corrupted because commercial enterprises appear to have been allowed to take priority over best matches to the search criteria. This has greatly diminished the ability of users to find what they want.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.

Date: 17 July 2016 14:10:14

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

There has to be a place for individual opinion in this corporate world. The internet can be an enormous force for good but only if it remains neutral and serves its users, not vast corporations.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.

Date: 17 July 2016 14:00:16

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality protects us from a corporate takeover of the Internet, as it fosters diversity, equality, competition and innovation across the whole of the internet.
- If 'fast lanes' are allowed, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and anyone seen as a business threat to exist on the internet.
- I strongly urge you to close any and all loopholes in the current proposals that would allow internet service providers to prioritise any content and act as gatekeepers (or judge/jury/executioner) of the internet.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Europe MUST follow this lead.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

<https://avaazimages.avaaz.org/GuidelinePolicyAnalysisPdf.pdf>

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

Like many internet users I have been quite alarmed by the antics of some large corporations, who see the Internet, not as a vital resource for everyone, but as something that they can carve up and control purely for their own profit and selfish interests. I realise that many of them also fear the power that it gives to ordinary people, which allows us to organise opposition in the form of petitions such as this one.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 13:40:15

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 13:40:12

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 13:30:20

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 13:30:17

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 13:30:15

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

To whom it may concern,

As an EU citizen, I call for you to work to ensure nothing jeopardises net neutrality now or in the future. America, Brazil and India have already recognised how important it is not to have fast and slow lanes. The internet is changing the world but allowing companies to charge could end up limiting the potential benefits of this new technology

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 13:20:20

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 13:20:18

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

equal and open access to the internet is potentially one of the most important and civilising influences on human society in this century.

Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.

If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, millions of micro and small businesses and citizen movements like us to survive next to dominant players like Google and Facebook.

Giving global corporates de facto control of the internet will destroy an incredible opportunity for humankind to move beyond information slavery; to challenge lies, dispel hatred, and heal rifts. Righting the wrongs of our world has to come from ordinary citizens upwards, and the internet is the only tool capable of achieving that.

I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.

In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I earnestly request you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 13:20:13

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

<https://avaazimages.avaaz.org/GuidelinePolicyAnalysisPdf.pdf>

Date: 17 July 2016 13:10:20

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

I was just wondering why we don't just pay for our internet in a way that means wifi coverage is universal and freely accessible to all. Now I read that you want to create a tiered system that will further disadvantage some and increase segregation. This is beyond disappointing.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

Net neutrality is so important. It allows freedom of speech, empowers innovation across the globe and promotes diversity and equality. Please take this into account.

I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, “zero-rating” or class-based traffic management.

In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it’s Europe’s turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 12:40:20

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

Net neutrality is key in today's Europe and an essential part of democracy. 'fast lanes' for the highest bidder will concentrate power in the hands of already extremely dominant players like Google and Facebook and will significantly slow down innovation by hindering start ups and smaller businesses to develop competitive products.

I urge you to close all loopholes in the current proposals that would allow service providers to prioritize certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.

Regulators in Brazil, the US and India have already understood the importance of net neutrality and adjusted legislation. Let's not fall behind, do the same and create legislation protecting net neutrality.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Living in Australia we have corporate control of the internet in place. This system has Australia with one of the lowest internet usage rates of the developed world, and seriously impedes business growth.

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

Along with many others, as an amateur ecologist and wildlife recorder, I personally need the best possible access to the Internet for my studies and research of the natural world in the UK. Monitoring changes in our wildlife populations and taking action, where necessary, to protect it, is vital for the well-being of all, including the human population. Therefore, rapid data access is paramount for these purposes.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 12:30:21

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Date: 17 July 2016 12:30:18

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Date: 17 July 2016 12:10:20

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Date: 17 July 2016 12:10:16

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

A free, democratic internet is essential to all those people, businesses and organisation that do not have the financial means to buy preferential treatment. By keeping the internet free of different 'lanes', we give all good ideas and enterprises the same chance to positively add to, or even change, our world.

Please take the following points into consideration:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 12:10:11

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 12:00:22

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 12:00:18

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Date: 17 July 2016 12:00:14

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

We need a free internet, because it's the emblem of freedom, and it should be the same for everyone.

If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook. In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

The Internet should be open and free for all

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

The creator of the www allowed free access to everyone on an equal basis and this principal should be paramount.

Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.

There should not be any 'fast lanes' available to those who can afford to pay as everyone else will be at a disadvantage. This discrimination would make it harder for independent media, start-ups and citizen movements to survive next to dominant players like Google and Facebook.

Please close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.

In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 11:30:12

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

It is of huge benefit to the world's population that access to the Internet is free and equal for all. This is one of the most democratising forces to have emerged in recent years. To allow special favours to be marketed to those with full pockets will inevitably mean that the power of the internet for the rest of the world is reduced.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation. An Internet which development, architecture and components were fully funded by the public.

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.

- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.

- In the Netherlands, Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

<https://avaazimages.avaaz.org/GuidelinePolicyAnalysisPdf.pdf>

Kind regards,

Chris Huemer
Austria

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir/Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

You will have received a lot of comment on this.....The general comment is at the end but the comments immediately below are some of my views which I hope you will take into account regarding this matter.

The world wide web was not invented by a large corporation. The man who did invent it would be appalled if large corporations were allowed to try and control it for their own purposes.

It would be particularly counter-productive, given that many parts of the world have already protected universal access to the net, if the EU were to bend to self-serving and wholly unjustified pressure from any large corporations. It would be bad for the people of the EU and public perception of the EU.

The people of the EU need to be protected from the greed and self interest of large corporations. Such organisations never consider the public interest unless it suits them. Thank you for your consideration. The comments below are generic

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 10:50:19

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Date: 17 July 2016 10:50:17

Dear Sir / Madam

The Internet should not be controlled by the greedy few that wish to exploit every resource for profit but also for everyone and anyone to access equally. The Internet needs to retain its neutrality and not become a corporate tool with fast lanes for corporations and slow lanes for everyone else. Please preserve the Internet as it is right now. We cannot allow the privileged few to control what we do on line. Please ensure that the Internet continues to be free and open to everyone, no discrimination. Corporate greed is destroying our world please do not allow it to destroy the Internet, a revolutionary tool that allows everyone a voice.

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 10:30:18

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

The internet should be and remain free and open to all citizens/users of the world and not under the control, as in so many other spheres of commerce, by too over-powerful multinationals. In Europe, the EU-internet must remain free and open and not the profit-making/commercial tools of the multinationals Vodafone/Nokia/Deutsche Telekom! Hands-Off the controlling multinationals!!

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 10:20:12

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

I am writing to you as a concerned citizen of the UK.

In addition to being a teacher in a school, I also run a part time business offering a web-based learning programme to primary school children.

Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.

If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, educational providers and small businesses like my own to survive next to dominant players like Google and Facebook.

The Internet has been a wonderful innovation and currently is a fair and equitable system. We MUST keep it that way!

I join with others in urging you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.

I strongly request that you amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 10:10:16

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 10:10:13

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 10:10:07

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 17 July 2016 10:00:15

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

I call on EU regulators to ensure that this is the final battle for net neutrality.

Let this be the occasion where the EU finally stands up to the mega-corps and ensures Net Neutrality cannot be attacked again in the future.

Act now to ensure the telecom giants realise that they have finally lost the battle to rob us of a free and open internet. They can then stop wasting resources on trying to create unjust hierarchies that benefit corporations and the rich, and instead invest their resources into improving connection speeds and infrastructure for all internet users.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Calling oneself a democrat obligates, and I Urge you to please consider this while processing the creation of BEREC net neutrality.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:
