Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules are so important in protecting all of us from a corporate takeover of the Internet; fostering diversity, equality, competition and innovation. These important principles will suffer if we do not protect them.

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook. It will be a totally unfair playing field and the innovation that allowed Google and Facebook would be prevented.

- Please close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.

- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

**Date:** 16 July 2016 22:40:21

---

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

**Subject:** Stakeholder comment regarding the BEREC net neutrality guidelines creation  
**Date:** 16 July 2016 22:40:18

---

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
  - If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
  - I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
  - In Brazil, the US and India, regulators have adopted strong net neutrality guidelines creation into consideration.
- net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

**Subject:** Stakeholder comment regarding the BEREC net neutrality guidelines creation  
**Date:** 16 July 2016 22:10:18

---

Dear Sir / Madam,

The internet has, for the first time ever, made possible near-universal access to information and communication. This is an opportunity for democracy, culture and humanity itself which can not be allowed to be curtailed by the vested interests of powerful groups.

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

This is very important!

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

---

Dear Sir / Madam,

The advent of the internet has fundamentally changed how our society functions. While maintaining a tier free internet will be financially challenging, the consequences to innovation, competition and free speech should this not happen are absolutely staggering.

The speed at which you access content on the internet is equally if not more important than the content itself and allowing a select few companies to create a "fast lane" for their content immediately forces all other content into the slow lane. And in the rapid world of the internet the slow lane leads directly to oblivion.

Please ensure that my generation and further generations has equal access to the fantastic resource that is the internet.

Yours  
Rumhann Howard-Hildige

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

BEREC net neutrality guidelines

Please work to keep the internet free and open. It is a key element in supporting freedom of information, supporting democracy and freedom of trade. Do not let the internet become controlled by the big telecoms giants to the detriment of ordinary people.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

Net neutrality is essential if the potential of the internet is to benefit the general public, who are now required to do so many transaction online.. We have no choice but to use it for work and bureaucracy. Allowing telecoms companies to relegate these necessary functions to a reduced service while boosting leisure and trivial activities will kill the goose that laid the golden egg.

Telecoms companies already have too much power over our lives, please don't let them wreck our livelihoods as well.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

<https://avaazimages.avaaz.org/GuidelinePolicyAnalysisPdf.pdf>

Dear Sir / Madam,

Please take this stakeholder comment into consideration in relation to the creation of the BEREC net neutrality guidelines.

This is important to me because

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

<https://avaazimages.avaaz.org/GuidelinePolicyAnalysisPdf.pdf>

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For these reasons, I urge you to give careful consideration to issues highlighted by the following policy analysis:

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

At a time where we need - more than ever - new solutions to very long standing problems, grassroot movements, small new business start-ups, exchange between like-minded, lots of diversity and much more equality, I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, “zero-rating” or class-based traffic management. We need strong Net Neutrality Rules to safeguard our democracy. Everybody is already forced to keep up with unending digital renewals in a very undemocratic way, which makes for inequality - the elderly, those with less money are left outside.

- If we allow ‘fast lanes’ for the highest bidder, everyone else will end up in a ‘slow lane’. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.  
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it’s Europe’s turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

<https://avaazimages.avaaz.org/GuidelinePolicyAnalysisPdf.pdf>

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration. This is not only about fast lanes, but also using exclusivity to manipulate a service that today is as important as electricity was before.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

I believe in the principle of free and equal access to the internet. The internet is a tool for humankind.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

---

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:
