- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

**Date:** 16 July 2016 21:10:16

---

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

---

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

What you're doing is a disgrace and needs to be halted immediately.

Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.

If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.

I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.

In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

Senior citizens who lose their mobility now use the internet for both communication and to retain their sanity.

The removal of this facility could lead to a form of detrimental victimisation. This must not be allowed to happen.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.

If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook - who were once also small and were allowed equal opportunity to become big.

I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.

In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Net neutrality stands for diversity, equality, competition and innovation. Please do not allow a two-class internet society where the big players like Google and Facebook are operating in the 'fast lane' and everyone else will end up in a 'slow lane'.

I urge you not to allow this kind of discrimination.

Freedom of speech, equal access to information and civic participation - the cornerstones of our democracy - would be undermined.

In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

**Date:** 16 July 2016 20:30:14

---

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

Deus VULT!  
We will free the internet!

The internet is the last of mankind which holds it back from falling apart to a crushed disaster. Our world is not rich anymore, not grand and cannot take more hits as it is.

The last of the connections and share of the human psyche is going through these portals, which grand companies don't want to exist. They want it destroyed in their greed. They act like spoiled children whom hands was never hit. But if it is allowed, what will remain?

So little holds the people back from a blind revolt to everything. Not the government or the great trading lords, bank lords. The people would destroy everything humanity built. Chaos would commence, simple because people are addicted to the internet. That's where they find peace. Without it, there is nothing that holds a wall against the emptiness inside.

But bigger companies ruin everything. I witnessed as great portals with 800k loveing and liveful users stopped being after cenzure. Only 80-50k cynical user remained visiting from time to time and admin bots. Lots of admin bots were created to keep up the visuals. But those are not people.

These people reunite and recreate, but if you steal even this? What will they have? How will they connect? What will they do in their despair and hatred? What will they do when they are bored and horned of work?

I can tell you, but I'm sure you know it. Remember back what was Germany doing, or France, what happened in Hungary.

Without the internet, a chatastrophe will commence. You cannot~ You should not pester with it's core!

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation. Sir Tim Berners Lee, who invented the web, gave it to everyone because he understood the need for us all to be part of the world web community. How dare you now think you have the right to allow loopholes to allow service holders to act as our guardians? Europe you must wake up and act for your citizens and not crawl to each and every whim of big corporate giants. What kind of a future are you carving out for your children or grandchildren if you allow these firms to dominate and run our lives?

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.

- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.

- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet. Please act responsibly for the citizens of Europe.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

---

A two-tier internet would not only be against its own founding principles of being open to all, regardless of wealth or social status, but ultimately be to the detriment of all. To leave the possibility of creating faster and slower versions of the World Wide Web, funded by large corporate interests could stunt its growth and limitless potential.

Please do not allow this to happen by closing current legal loopholes.

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

Please remember, that democracy - our democracies - were build on enlightenment through equalising access to knowledge and channels communication. This is our birthright - the core and heart of democracy. Reducing equality on these matters is reducing democracy.

Let's enhance democracy!

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

**Date:** 16 July 2016 20:10:14

---

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

I live on an island off the coast of the Republic of Ireland and as such am very dependent for my communications on the internet. In addition, I am blind and would make a special point on behalf of both disabled persons, who need the Internet more than most, and of islanders and those living in remote rural and maritime areas. Frequently our possibilities of other means of communication are very limited and if we are to have a fair share of the use of the Net for both social and business use, there must be tight Net neutrality rules, rigorously enforced by the regulator.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

<https://avaazimages.avaaz.org/GuidelinePolicyAnalysisPdf.pdf>

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

**WE WANT EVERYONE INCLUDING PENSIONERS AND PEOPLE ON LOWER INCOMES TO BE PART OF THE NATIONAL ON-LINE COMMUNITY.**

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

<https://avaazimages.avaaz.org/GuidelinePolicyAnalysisPdf.pdf>

---

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet. We can't let our neutrality rules be worse than the US and India - Surely?!

For this reason, PLEASE amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

I believe it should not be up to some telecom companies to decide what happens to the internet, which belongs to everyone. It is a tool that everyone should be able to use equally, without having companies deciding what content should be able to reach you easily and hindering everything else. To give them the power to do so would be a grave insult to the very idea of freedom and equality.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

I urge you to take seriously how we feel about the current draft guidelines - we live in a democracy in which we the people have a voice. We ask you to hear us out and consider our democratic freedoms in this issue. I am using the following prescribed message as I feel it best describes the matter in hand - to keep the internet free and open and not the property of the highest bidder.

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

---

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

---

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

To take away from citizens of a so called republic the neutrality of information ( which pretty much doesnt exist anymore in mainstream media ) , is the action of a tyrant .

I strongly oppose to that .

The possibility that we have to look for different information source on internet , is the only way to keep us interested about our country and our world affair . Which is my duty as a citizen .

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

Equal access to the internet for all is proving to be a vital new way for the democratic process to work. It would be greatly disadvantaged if mega business and wealth were able to claim priority in the proposed way.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

Why is it that the rich and powerful multinational companies are so greedy. They seem to think they have a right to over-ride a system which has served us all without distinction for many years. The chief executives and their staff should be ashamed of themselves for even suggesting the change. They should remember also that as individuals we can change our telephone providers very easily.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.

**Subject:** Stakeholder comment regarding the BEREC net neutrality guidelines creation  
**Date:** 16 July 2016 19:40:16

---

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:
