 - If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
 - I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
 - In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.
- After the BREXIT lesson, it is also HIGH TIME for you to begin to listen to what people want. Brexit was a first, but if you keep acting contrary to the vast majority's wishes and demands, it will not be the last!

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Access to the Internet is vital for all aspects of modern life. Restricting its use to only those who can afford to pay would be as damaging as to stop teaching poorer school children to read and write. Digital inclusion is what nowadays creates a literate workforce and helps to develop social cohesion.

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 15 July 2016 10:47:52

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

The EU is losing credibility faster than a burning oil rig. There is a steady stream of decisions that are perceived as anti-democratic, special-interest driven or outright corrupt.

Compromizing net neutrality would be another decision that is inherently dangerous to democratic participation. Both political discourse and campaigning rely on the internet, and this will only increase in the future.

Original boilerplate message:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.

Date: 15 July 2016 11:18:20

Dear Sir / Madam,

PLEASE take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration and disallow any amendment to the current regulations.

The freedom of the Internet is, in reality, the only real freedom we have to make our (real people's) views known and to discuss with each other anything and everything so that we can further our knowledge. Curtailing this freedom opens the doors to the enslavement of the populace - and potentially to a disaster like that of 1939.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 15 July 2016 10:47:29

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 15 July 2016 10:47:18

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 15 July 2016 10:47:04

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 15 July 2016 11:18:19

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 15 July 2016 11:18:18

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 15 July 2016 11:18:18

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 15 July 2016 11:18:18

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

If the voices of individual citizens and those organisations that represent them are overwhelmed or muted by the interests of big business, the democratic process is undermined and the greedy and powerful become the new dictators.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

The Internet was created for everyone to use and enjoy freely and equally, not for greedy Corporations to take it over in order to make more money.

The Net neutrality rules protect all of us from a corporate takeover of the Internet, they foster diversity, equality, competition and innovation.

DO NOT allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.

- I IMPLORÉ you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

The internet is the greatest invention of our time because it has wielded the incredible positive force of open and democratic communication. The well-being of big companies is also important for our continued affluence and freedom, but it's grains of sand compared to the historic importance of the free internet.

You can't blame the corporations for trying to make as much profit as possible. That's what they have to do. The responsibility to protect the free internet - as well as all our other essential freedoms - lies with the regulatory bodies such as the EU.

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 15 July 2016 11:17:51

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 15 July 2016 11:17:48

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 15 July 2016 11:17:43

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 15 July 2016 11:17:38

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 15 July 2016 11:17:33

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Subject: Stakeholder comment regarding the BEREC net neutrality guidelines creation
Date: 15 July 2016 11:17:27

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Dear Sir / Madam,

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:

Please take this Stakeholder comment regarding the BEREC net neutrality guidelines creation into consideration.

- Net neutrality rules protect all of us from a corporate takeover of the Internet, as they foster diversity, equality, competition and innovation.
- If we allow 'fast lanes' for the highest bidder, everyone else will end up in a 'slow lane'. This discrimination would make it harder for independent media, start-ups and citizen movements like us to survive next to dominant players like Google and Facebook.
- I urge you to close all loopholes in the current proposals that would allow service providers to prioritise certain content and act as gatekeepers, through preferential treatment, "zero-rating" or class-based traffic management.
- In Brazil, the US and India, regulators have adopted strong net neutrality rules after an overwhelming response from ordinary citizens to their consultations. Now it's Europe's turn to protect an open and democratic Internet.

For this reason, I urge you to amend the current draft guidelines according to the following policy analysis:
