**AT&T response to BEREC Consultation on a Report on IP-Interconnection Practices in the Context of  
Net Neutrality** / Document number: BoR (17) 134

We welcome the opportunity to comment the BEREC draft report on “IP-Interconnection practices in the contest of net neutrality”.

We share BEREC conclusions in respect to the efficiency of market mechanisms, and in particular with the BEREC conclusion that there is no need for regulatory intervention and that monitoring of market practices is sufficient.

We remain available to be engaged in further discussions.

Best regards
