Subject: Why there starts this discussion aggain?
Attachments: signature.asc

Hi,

regarding "Public consultation on draft BERC Guidelines on common approaches to the identification of the network termination point in different network topologies" my question is, why does dis discussion start again?

We've allready good and user friendly regulation.

There is no new fact in using glasfiber, so the only reason for change is protection for non performing monopolists.

Protect us the citicens! We need no new bad deals, we need no change in policy!

BG, [REDACTED]
