Hello,

it came to my attention that your discussing the location of the NTP and that your asking for public feedback. Thank you very much for that. I think that this is a great opportunity for anyone to be part of that.

To make it short: After I informed myself thoroughly I can fully support the arguments of the Free Software Foundation Europe (FSFE) and want to submit them to you, as if it were my own words. So this document https://download.fsfe.org/policy/routers/20191121-BEREC-Guidelines-Consultation.pdf expresses my thoughts and I come to the same conclusions. Point A as the NTP is the best option!

Best regards,
████████████
